Education Track

AvaluaPro

Privacy-Conscious AI Teacher Briefing

Built by a teacher for teachers

AvaluaPro turns classroom assessment, work habits, behavior and group dynamics into actionable teacher intelligence. During Build Week, it gained a privacy-conscious bridge to AI that keeps the teacher in control.

Existing product foundation

Competency assessment, daily follow-up, classroom analytics, tutor mode, sociometry, cooperative groups and seating tools were already working before Build Week.

Built during Build Week

A new AI Teacher Briefing creates a teacher-reviewed prompt and a separate pseudonymized JSON package with explicit privacy guardrails.

The screenshot shows the AvaluaPro web application interface. At the top, there's a navigation bar with the AvaluaPro logo, a '2n Demo' button, and a 'Dades i Compte' dropdown. Below the navigation bar, there's a 'DADES DEMO' section with a warning icon and text: 'Comences amb una aula inventada perquè vegis com funcionarà AvaluaPro amb dades completes. Les notes, tasques, comentaris i estadístiques són fictícies. Fes la guia interactiva i, quan estiguis a punt, esborra la demo per començar amb la teva matèria, classes i alumnes.' To the right of this text are two buttons: 'Veure guia' and 'Començar amb les meves dades'. Below this is a row of tabs: 'Avaluació', 'Seguiment', 'Estadístiques Globals', 'Briefing IA', 'Mode tutoria', and 'Urgent'. The 'Briefing IA' tab is selected. Below the tabs, there's a section for 'UT1', 'UT2', and 'UTs'. The 'Briefing IA' section is titled 'Briefing IA segur per al docent' and contains the text: 'Converteix les dades de la classe en un paquet pseudonimitzat que pots revisar abans de copiar-lo a una IA. AvaluaPro no envia res automàticament: exclou noms, diagnòstics i observacions textuais, però conserva mesures pedagògiques concretes sense etiqueta clínica.' To the right of this text is a green box with a shield icon and the text: '0 identificadors directes. La correspondència real queda només dins d'AvaluaPro.' Below this is a section for '2n Demo' with the text: 'Ciències Físiques i de la Natura - UT1'. To the right of this text is a box with a lock icon and the text: 'Porta de sortida manual. El docent revisa i copia el paquet si ho considera adequat.' Below this is a row of four boxes: 'ALUMNES' with '20' and 'Alumnes pseudonimitzats com Student A, Student B...'; 'IDENTIFICADORS' with '0' and 'Cap nom, correu ni identificador permanent.'; 'SUPORTS PEDAGÒGICS' with '4' and 'Perfils de focus amb mesures concretes i sense etiqueta clínica.'; and 'MAPA LOCAL' with 'No copiat' and 'La IA rep mètriques, no identitat ni diagnòstics.' Below this row is a section titled 'Com utilitzar el briefing' with the text: 'Segueix aquests quatre passos. AvaluaPro no envia cap dada automàticament.' To the right of this text are four numbered steps: 1. 'Copia les instruccions' (Es el prompt que indica a la IA què ha d'analitzar i); 2. 'Descarrega les dades pseudonimitzades' (El JSON conté senyals i mesures pedagògiques,); 3. 'Obre una IA autoritzada' (Enganxa el prompt i adjunta-hi el fitxer JSON.); 4. 'Interpreta els àlies' (Consulta la correspondència inferior per saber a).

Live fictitious demo data. No real student information is shown in this brief or the submitted video.

Useful AI starts with a controlled data boundary

The new workflow deliberately separates preparation from transmission. AvaluaPro does not call an AI provider automatically and does not contain an API key for model access.

1 Copy the instructions A constrained prompt defines the educational task and prohibits identity or diagnosis inference.	2 Download the JSON The selected classroom signals leave as a separate, inspectable pseudonymized file.
3 Use an approved AI The teacher decides whether to paste the prompt and attach the file in an authorized environment.	4 Interpret locally The alias-to-name correspondence remains inside AvaluaPro for human interpretation.

Dades i Compte

0

ALUMNES

20

Alumnes pseudonimitzats com Student A, Student B...

IDENTIFICADORS

0

Cap nom, correu ni identificador permanent.

SUPORTS PEDAGÒGICS

4

Perfils de focus amb mesures concretes i sense etiqueta clínica.

MAPA LOCAL

No copiat

La IA rep mètriques, no identitat ni diagnòstics.

Com utilitzar el briefing

Segueix aquests quatre passos. AvaluaPro no envia cap dada automàticament.

1

Copia les instruccions

És el prompt que indica a la IA què ha d'analitzar i quins límits ha de respectar.

Copiar prompt

2

Descarrega les dades pseudonimitzades

El JSON conté senyals i mesures pedagògiques, però no noms, diagnòstics ni text lliure.

Descarregar paquet JSON

3

Obre una IA autoritzada

Enganxa el prompt i adjunta-hi el fitxer JSON. Revisa la resposta abans d'actuar.

4

Interpreta els àlies

Consulta la correspondència inferior per saber a quin alumne es refereix la resposta.

Què queda fora del paquet IA

Aquest filtre és intencionat: redueix risc abans d'usar qualsevol proveïdor d'IA i obliga a mantenir revisió humana. Les mesures pedagògiques s'inclouen sense indicar el diagnòstic que les pot haver motivat.

noms

cognoms

correus electrònics

fotografies

diagnòstics

informació familiar

observacions textuais

mapa de correspondència

4. Correspondència per interpretar la resposta

Aquesta relació queda dins d'AvaluaPro i no forma part del briefing copiat.

Student T

Excluded from the AI package

Names, surnames, email addresses, photos, diagnosis labels, family information, raw free-text observations and the local identity map.

Still useful for teaching

Competency, consistency, behavior, group and sociometric signals, plus a limited set of concrete classroom accommodations without diagnosis labels.

Important: Student A is pseudonymous, not anonymous. The package remains personal data because AvaluaPro retains the local correspondence. AI output is advisory and must be reviewed by a teacher.

Page 2

Try the complete workflow in under two minutes

1	Open the production demo Go to avaluapro.web.app . Keep the fictitious classroom loaded; no account is required.
2	Open Briefing IA Choose the AI Briefing tab and confirm the summary reports zero direct identifiers.
3	Review the four explicit steps The prompt is copied separately from the downloadable JSON package. Nothing is sent automatically.
4	Inspect technical content Open the technical details and locate <code>pedagogicalSupportNeeds</code> beside temporary aliases.
5	Check the identity boundary The correspondence is visible inside Avaluapro but absent from both outgoing pieces.

How Codex was used

Marc defined the classroom problem, product decisions and privacy boundaries. OpenAI Codex acted as the engineering collaborator: inspecting the existing architecture, implementing the generator and React interface, integrating the workflow, creating tests, refining the UX and preparing the evidence package.
